operational/ experimental science vs. origins/ historical science	Grand Canyon carved by the Flood	Incest was OK for Cain	Appeal to Bible to decide what "kinds" there are	Evolution the root of all evil
Radiometric dating is unreliable	Scientists are all atheists	We have real scientists	Dinosaurs were on the Ark	Unexplainability of the origin of life
If you don't accept Genesis, then how can you accept Jesus's message of salvation?	Plausibility of so many animals on Noah's Ark	<b>Gish gallop</b>	We have real journals	Micro/macro- evolution
Allegations of persecution of creation scientists	Quote-mining a scientist	No transitional fossils	"Secular assumptions"/ different interpretations	This is a real museum
Famous scientist X was totally a creationist	Goddidit!	infallible Bible vs. fallible human reason/Inerrant Bible vs. mutable science	Impossible to create information	"Were you there?"
