

Think Evolution: A Summer Institute for Science Educators

**Calling all middle and high
school science teachers!**

Put on your evolution eyeglasses and your nature of science thinking cap and join us for a fun-filled four days of evolutionary explorations with biologists and educators from the University of California. The Think Evolution Summer Institute will combine lectures by prominent biologists with sessions focused on hands-on activities for the middle and high school classroom. Topics to include: tree-thinking; mechanisms and applications of evolution; molecular and human evolution; and the important role of developmental biology in generating new insights into evolution. Hear about the most recent developments in evolution and have an opportunity to explore how to integrate these topics into your curriculum. Follow up with biologists and participating educators at the Evo-Picnic to be held the following February.

**Tuesday, August 11
to
Friday, August 14**

9:00 AM–3:00 PM at the
University of California
Museum of Paleontology

\$75.00 for four days
(college credit available
for additional cost)

*Lots of free resources distributed to
participating teachers plus morning
and afternoon snacks!*

Limited enrollment, so for further information,
contact Louise S. Mead (mead@ncseweb.org)
or Judy Scotchmoor (jscotch@berkeley.edu)

Registration

The cost of this summer course is \$75 which will cover snacks and all materials. Lunch is not provided. College credit is optional and will be an additional cost—still under negotiation.

Please fill out the following form and mail it, along with a check for \$75 made out to **UC Regents**, to:

University of California Berkeley
Evo Summer Institute
